

The Career Balance Wheel

The Career Balance Wheel provides a visual gap analysis between current professional priorities and desired future states. This diagnostic tool identifies critical development areas to formulate targeted, strategic action plans for career progression.

CURRENT STATE

- Salary & Benefitst 4
- Work-life Balance 3
- Career Growth 5
- Learniing & Development 10
- Job Security 8
- Team & Culture 6
- Meaningful Work 2
- Autonomy 1
- Recognition & Feedback 2

DESIRED STATE

- Salary & Benefitst 9
- Work-life Balance 7
- Career Growth 6
- Learniing & Development 4
- Job Security 9
- Team & Culture 8
- Meaningful Work 7
- Autonomy 5
- Recognition & Feedback 7

ACTION STEPS – GROWTH PATH AT SBER

Salary & Benefits (4→9)

- Successfully pass probation period and secure junior position
- Achieve Middle level within 2-3 years through performance reviews
- Complete internal Sber career development programs

Meaningful Work (2→7)

- Start in ML/AI department working on Sber's core products (SberBox, Salute, etc.)
- Transition to high-impact projects with visible business results
- Participate in Sber's innovation initiatives and hackathons

Recognition & Feedback (2→7)

- Establish regular 1-on-1 meetings with mentor/manager
- Deliver successful projects and present results to team
- Build internal reputation through code reviews and knowledge sharing

Autonomy (1→5)

- Master Sber's tech stack and development processes
- Progress from task execution to independent feature ownership
- Lead small ML projects or modules by year 3-4

Work-Life Balance (3→7)

- Adapt to Sber's hybrid work model effectively
- Build efficient workflows to minimize overtime
- Negotiate flexible schedule after proving performance

Learning & Development (10→4)

- Shift from intensive learning to applied practice
- Leverage Sber's internal training (SberUniversity, courses)
- Focus on on-the-job learning rather than external courses

Career Goals

This framework maps professional development from a current baseline to a defined five-year objective, aligning long-term targets with core values to decompose overarching career aspirations into actionable, time-bound stages.

Today (point A)	2-3 years	Career goal (point B) 5 years
Current Role & Status: • Student at School 21 (ML/AI track) • Learning Python, ML algorithms, data analysis • Actively preparing for junior ML Engineer positions Skills & Knowledge: • Programming: Python (basic-intermediate) • ML: Scikit-learn, pandas, numpy, basic neural networks • Small portfolio of academic and personal projects Resources Available: • School 21 education and peer community • Online courses (Coursera, Stepik, Kaggle) • Time for intensive learning (40+ hours/week) • Strong motivation to join Sber's ML team What's Important Now (from Current Wheel): • Learning & Development (10/10) — intensive skill building • Job Security (8/10) — stable employment at Sber • Career Growth (5/10) — entry-level position with growth potential		Target Position: • Middle/Senior ML Engineer at Sber • Working on high-impact AI products (SberBox, Salute, recommendation systems, fraud detection) • Team member or technical lead of 2-3 junior developers Key Achievements: • Successfully delivered 5-10 production ML models • Contributed to Sber's internal ML platform or framework • Received promotion from Junior to Middle (or Senior) • Built strong internal reputation and professional network Skills to Master: • Advanced ML: deep learning, MLOps, model deployment • Sber's tech stack: internal ML platforms, cloud infrastructure • Soft skills: mentoring, technical presentations, project management Success Metrics: • At least 1 promotion (Junior → Middle) • Leading or significantly contributing to 1 major Sber product • Positive feedback from stakeholders and team members
